

## WHBB3UV Series

# Whole-House Ultra-Violet Protection

Atlantic Filter's Clearguard WHBBU/V Series combine proven filtration & disinfection technologies to deliver economical & compact, stand-alone solutions for whole-house water purification. Taste & Odor reduction paired with our proven Ultraviolet disinfection technology will eliminate 99.99% of bacteria & viruses, including chlorine resistant cysts. These systems are simple to install and can be used anywhere clean, filtered, disinfected water is desired.

*These quality filter systems will provide you with:*

- Clean, Clear, Safe & Well Guarded Water
- Water free of Chlorine tastes & odors
- Whole-house water treatment for primary residences or vacation homes where clean, disinfected water is desired.
- Point-of-use applications including: Homes or condominiums, businesses & offices, marine & recreational vehicles, post treatment to reverse osmosis & hundreds of other uses.

### *Check out these Features.....*

- Kills 99.9% of Harmful Microorganisms
- NSF/ANSI Standard 42 Certified Filtration Housings
- Two-stage pre-filtration designed for Sediment & Taste/Odor Reduction
- Sterilight Ultraviolet System w/ 304 Stainless Steel Reactor Chamber for disinfection
  - LED Electronic Controller to monitor U/V Lamp Life & Running Time
  - One (1) Micron "Final Barrier" Entrapment Filtration
    - Manufacturer's Parts & Labor Warranty

# SELECT THE WHUVBB SERIES SYSTEM THAT FITS YOUR NEEDS!

The “**First-stage**” of filtration reduces suspended solids & particles down to five (5) microns in size, followed by the “**Second-stage**” of filtration which reduces tastes & odors, chlorine & chloramines, leaving the filtered water clean and refreshing. Then the water passes through the “ultraviolet sterilization reaction chamber” where it is disinfected by ultraviolet light. In addition to bacteria (E. coli), virus, algae, mold and others, Sterilight UV systems are effective against protozoa such as **Cryptosporidium** and **Giardia lamblia**. UV effectively DESTROYS these protozoan cysts at dosage levels well within the levels delivered by all Sterilight ultraviolet disinfection systems. Lastly, the “sterilized water” passes through the “**Third-stage**” of filtration, a one (1) micron “final barrier” filter to assure the removal of any dead bacteria that the U/V may have destroyed, leaving your water safer, cleaner and free of harmful chemicals, and bacteria.

Model #	Inlet / Outlet	Dimensions	Service Flow Rate	Electrical	Shipping Weight
WHBBUVS8Q	1" NPT	38" L x 8 ½" W x 28" H	10 GPM	120V/60hz	45 lbs.
WHBBUVVH410	1" NPT	38" L x 8 ½" W x 28" H	18 GPM	120V/60hz	48 lbs.

If you are looking for a high quality, economical filtration + U/V treatment system to improve the water in your home or business, Atlantic Filter’s Clearguard WHBBU/V Treatment Systems are the answer! Quality & dependability for those who demand the best! Another proven winner from the leader in water filtration for over half a century!
